

# Ambuja Cement

MCW / EMD /12 / 2024/ C 1 6

May 24, 2024

To,  
The Ministry of Environment & Forest & CC  
Regional Office (WCZ), Ground Floor  
East Wing, New Secretariat Building,  
Civil Line, Nagpur-440001

Kind Attn: - **Additional Director**

Sub : Submission of Half yearly monitoring report for the period of **October 2023 to March 2024** of M/s Ambuja Cements Ltd. (Unit: Maratha Cement Works, Upparwahi), Chandrapur (Maharashtra)

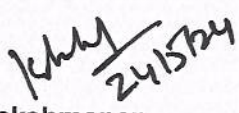

Ref: **EC Identification No. EC22A001MH156228 and File/Letter No. IA-J-11015/62/2018-IA-II(M), dated 29/07/2022**

Dear Sir,

This has with reference to the above referred EC & the subject matter; we are submitting herewith six monthly compliance report (for the Period of October 2023 to March 2024) for the various conditions stipulated vide above referred EC for our Proposed Nandgaon-Ekodi Limestone Mine.

We hope that you will find this information in order please.

For, **Ambuja Cements Ltd.**  
(Unit- Maratha Cement Works)

  
**K Subbulakshmanan**  
**Chief Operations Manager**

Encl :- a/a

**COMPLIANCE STATUS OF MoEFCC EC CONDITIONS OF  
2.0 MILLION TON / ANNUM Proposed Nandgaon-Ekodi Limestone Mine**

**Period from 01.10.2023 to 31.03.2024**

(EC Identification No. EC22A001MH156228 and File/Letter No. IA-J-11015/62/2018-IA-II(M), dated 29/07/2022)

Sr. No.	Condition	Status/Report
<b>A.</b>	<b>Specific Conditions:</b>	
i.	The project proponent shall submit the annual progress report for plantation, implementation of EMP and capital investment done for addressing public concerns.	Annual progress report for plantation, implementation of EMP and capital investment done for addressing public concerns will be submitted after acquisition of land for mining.
ii.	Since the village is adjacent to mine, air, noise and vibration monitoring done at the interface of village and mine and necessary corrections through EMP improvement shall be submitted to the Ministry in every six months.	EC has been just received and the mining operations are yet to commence. Air, noise and vibration monitoring will be done at the interface of village and mine upon commencement of the mining operations and necessary corrections through EMP improvement will be done and report will be submitted to the Ministry in every six months.
III.	Since there is a proposal of avenue plantation, the specific target area, budget provision and species to be planted shall be informed to the Ministry.	Avenue plantation details will be submitted to the ministry in the EC compliance report.
iv.	Action taken report of R&R plan shall be submitted annually. As discussed during the meeting, the benefit to project affected persons as a percentage of the sale price of the product shall be submitted to the Ministry.	We will comply with the R&R plan as indicated in the final EIA report and presented to the Ministry. Action taken report against the R&R plan will be submitted annually.
v.	The project proponent shall monitor water quality at the source for supply to villagers with specific reference to Langelier Saturation Index to assess the impact of calcium carbonate on water quality.	We will comply with this requirement upon commencement of the mining operations.
vi.	The Project Proponent should periodically monitor and maintain the health records of the mine workers digitally prior to mining operations, at the time of operation of mine and post mining operations. Regular surveillance on Silicosis shall be carried through regular occupational health check-up every year for mine workers	We will comply with this requirement upon commencement of the mining operations.

<b>B.</b>	<b>Standard Conditions:</b>	
<b>I.</b>	<b>Statutory compliance</b>	
1)	This Environmental Clearance (EC) is subject to orders/ judgment of Hon'ble Supreme Court of India, Hon'ble High Court, Hon'bte NGT and any other Court of Law, Common Cause Conditions as may be applicable.	Noted.
2)	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors before commencing the mining operations.	Noted and will be complied upon commencement of the mining operations.
3)	The State Government concerned shall ensure that mining operation shall not be commenced till the entire compensation levied, if any, for illegal mining paid by the Project Proponent through their respective Department of Mining & Geology in strict compliance of Judgment of Hon'ble Supreme Court dated 2nd August, 2017 in Writ Petition (Civil) No. 114 of 2014 in matter of Common Cause versus Union of India & Ors.	Noted.
4)	The Project Proponent shall follow the mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29th October, 2014, titled "Impact of mining activities on Habitations-Issues related to the mining Projects wherein Habitations and villages are the part of mine lease areas or Habitations and villages are surrounded by the mine lease area".	The mitigation measures provided in MoEFCC's Office Memorandum No. Z-11013/57/2014-IA.II (M), dated 29 <sup>th</sup> October, 2014, will be followed upon commencement of the mining operations.
5)	A copy of EC letter will be marked to concerned Panchayat / local NGO etc. if any, from whom suggestion / representation has been received while processing the proposal.	Noted.
6)	State Pollution Control Board/Committee shall be responsible for display of this EC letter at its Regional office, District Industries Centre and Collector's office/ Tehsildar's Office for 30 days.	Noted.
7)	The Project Authorities should widely advertise about the grant of this EC letter by printing the same in at least two local newspapers, one of which shall be in vernacular language of the concerned area. The advertisement shall be done within 7 days of the issue of the clearance letter mentioning that the instant project has been accorded EC and copy of the EC letter is available with the State Pollution Control Board/Committee and web site of the Ministry of Environment, Forest and Climate Change ( <a href="http://www.parivesh.nic.in">www.parivesh.nic.in</a> ). A copy of the advertisement may be forwarded to the concerned MoEFCC Regional Office for compliance and record.	<b>Complied.</b> The advertisement was given in two local newspapers namely "Hitavada" and "Mahavidarbha" on 05.08.2022 and the copy of the same enclosed as <b>Annexure – 1.</b>
8)	The Project Proponent shall inform the MoEF&CC for any change in ownership of the mining lease. In case there is any	Noted and will be complied.

	change in ownership or mining lease is transferred. PP needs to apply for transfer of EC as per provisions of the para 11 of EIA Notification, 2006 as amended from time to time.	
<b>II.</b>	<b>Air quality monitoring and preservation</b>	
9)	The Project Proponent shall install a minimum of 3 (three) online Ambient Air Quality Monitoring Stations with 1 (one) in upwind and 2 (two) in downwind direction based on long term climatological data about wind direction such that an angle of 120° is made between the monitoring locations to monitor critical parameters, relevant for mining operations, of air pollution viz. PM10, PM2.5, NO2, CO and SO2 etc. as per the methodology mentioned in NAAQS Notification No. B-29016/20/90/PCI/I, dated 18.11.2009 covering the aspects of transportation and use of heavy machinery in the impact zone. The ambient air quality shall also be monitored at prominent places like office building, canteen etc. as per the site condition to ascertain the exposure characteristics at specific places. The above data shall be digitally displayed within 03 months in front of the main Gate of the mine site.	Upon commence of the mining operations, we will install three online Ambient Air Quality Monitoring Stations with 1 (one) in upwind and 2 (two) in downwind direction based on long term climatological data will be installed and display will be provided in front of the main Gate of the mine site.
10)	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipments/ machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEFCC/ Central Pollution Control Board.	Noted & will be complied upon commencement of the mining operations
<b>III.</b>	<b>Water quality monitoring and preservation</b>	
11)	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEFCC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.	Noted.
12)	Project Proponent shall regularly monitor and maintain record w.r.t ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in	Ground water level and quality in and around the mine lease will be monitored by establishing a network of existing wells as well

	consultation with Central Ground Water Authority/ State Ground Water Department. The report on changes in Ground Water level and quality shall be submitted on six monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department/State Pollution Control Board.	as new piezo-meter installations upon commencement of mining operation.
13)	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate place within the lease for management of water. The parameters to be monitored shall include there water quality vis-a-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/or alteration be made to water bodies during mining operations without justification and prior approval of MoEFCC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. Pre- monsoon (Aril May) monsoon (August) post monsoon (November) and winter (January) and the record of monitored data may be send regularly to Ministry of Environment . Forest and Climate change and Ground Water Board, State Pollution Control Board and Central Pollution Control Board. Clearly showing the trend analysis on six monthly basis.	Noted & will be complied upon commencement of the mining operations
14)	Quality of polluted water generated from mining operations which include Chemical Oxygen Demand (COD) in mines run off, acid mine drainage and metal contamination in runoff shall be monitored along Total suspended Solid (TDS), Dissolved Oxygen (DO), pH and Total suspended Solids (TSS). The monitored data shall be uploaded on the website of the company as well as displayed at the project site in public domain, on a display board, at a suitable location near the main Gate of the Company. The circular No. J-20012/1/2006-La,II (M) dated 27.05.2009 issued by Ministry of Environment, Forest and Climate Change may also be referred in this regard.	Noted & will be complied upon commencement of the mining operations
15)	Project Proponent shall plan, develop and implement rainwater harvesting measures on long term basis to augment ground water resources in the area in consultation with Central Ground Water Board/ STATE Groundwater Department. A report on amount of water recharged needs to be submitted to Regional Office MoEFCC annually.	Upon commencement of mining operations, we will implement the Rainwater harvesting measures on long term basis to augment ground water resources in the area.
16)	Industrial waste water (workshop and waste water from the mine) should be properly collected and treated so as to conform to the notified standards prescribed from time to time. The standards shall be prescribed through Consent to Operate (CTO) issued by concerned State Pollution Control Board	Water treatment systems for treatment of waste water generated from mines and mine workshop will be installed upon commencement of mining

	(SPCB). The workshop effluent shall be treated after its initial passage through Oil and grease trap.	operations.
17)	The water balance/water auditing shall be carried out and measure for reducing the consumption of water shall be taken up and reported to the Regional Office of the MoEF&CC and State Pollution Control Board/Committee.	Noted & will be complied upon commencement of mining operations
<b>IV.</b>	<b>Noise and Vibration monitoring and prevention</b>	
18)	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.	Noted and will be complied upon commencement of mining operations
19)	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day /night hours.	Noted and will be complied upon commencement of mining operations.
20)	The Project Proponent shall take measures for control of noise levels below 85 dBA in the work environment. The workers engaged in operations of HEMM, etc. should be provided with ear plugs /muffs. All personnel including laborers working in dusty areas shall be provided with protective respiratory devices along with adequate training, awareness and information on safety and health aspects. The PP shall be held responsible in case it has been found that workers/ personals/ laborers are working without personal protective equipment.	Noted and will be complied upon commencement of mining operations.
<b>V.</b>	<b>Mining plan</b>	
21)	The project proponent shall adhere to approved mining plan, inter alia, including, total excavation (quantum of mineral, waste, over burden, inter burden and top soil etc.) mining technology; lease area; scope of working (method of mining' overburden & dump management, OB & dump mining. mineral transportation mode, ultimate depth of mining, concurrent reclamation and reclamation of mine closure; land use of the mine lease area at various stages of mining scheme as well as at the end of life etc.)	Noted and will be complied upon commencement of mining operations.
22)	The land use of the mine lease area at various stages of mining scheme as well as at the end of the life shall be governed as per the approved Mining Plan. The excavation vis a vis backfilling in the mine lease area and corresponding afforestation to be raised in the reclaimed area shall be governed as per approved mining plan. PP shall ensure the	Noted and will be complied upon commencement of mining operations.

	monitoring and management of rehabilitated areas until the vegetation becomes self sustaining. The compliance status shall be submitted half yearly to the MoEFCC and its Concerned Regional Office.	
<b>VI.</b>	<b>Land Reclamation</b>	
23)	The overburden (O.B.), waste and topsoil generated during the mining operations shall be stacked at earmarked OB dump site (s) only and it should not be kept active for a long period of time. The physical parameters of the OB/waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining plan and the guidelines/ circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.	Noted and will be complied upon commencement of mining operations.
24)	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the microclimate. The gullies formed on slopes should be adequately consolidated with the help of dozer / compactor thereby ensuring proper filling / leveling of dump mass. In critical areas' use of geo textiles/ geo- membranes / clay liners / Bentonite etc. Shall be undertaken for stabilization of the dump.	Noted and will be complied upon commencement of mining operations.
25)	Catch drains, settling tanks and siltation ponds of appropriate size shall be constructed around the mine working, mineral yard and top soil/ OB /Waste dumps to prevent run off of water and flow of sediments directly into the water bodies (Nallah/ roads pond etc.) The collected water should be utilized for watering the mine area, roads, green belt development, plantation etc. The drains/sedimentation sumps etc. shall be de silted regularly , particularly after monsoon season, and maintained properly.	Noted and will be complied upon commencement of mining operations.
26)	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50 % shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments/ silt material, The sedimentation pits/ sumps shall be constructed at the corners of the garland drains.	Noted and will be complied upon commencement of mining operations.
<b>VII.</b>	<b>Transportation</b>	
27)	No Transportation of the minerals shall be allowed in case of roads passing through villages / habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation	Noted and will be complied upon commencement of mining operations.

	<p>of the minerals leaving an adequate gap (say at least 200 meters) so that the adverse impact of sound and dust along with chances of accidents could be mitigated. All costs resulting from widening and strengthening of existing public road network shall be borne by the PP in consultation with nodal State Govt. Department. Transportation of minerals through road movement in case of existing village/ rural roads shall be allowed in consultation with nodal State Govt. Department only after required strengthening such that the carrying capacity of roads is increased to handle the traffic load. The pollution due to transportation load on the environment will be effectively controlled and water sprinkling will also be done regularly. Vehicular emissions shall be kept under control and regularly monitored. Project should obtain Pollution Under Control (PUC) certificate for all the vehicles from authorized pollution testing centers. (If applicable in case of road transport).</p>	
28)	<p>The Main haulage road within the mine lease should be provided with a permanent water sprinkling arrangement for dust suppression. Other roads within the mine lease should be wetted regularly with tanker-mounted water sprinkling system. The other areas of dust generation like crushing zone, material transfer points, material yards etc. should invariably be provided with dust suppression arrangements. The air pollution control equipments like bag filters, vacuum suction hoods, dry fogging system etc, shall be installed at Crushers, belt conveyors and others areas prone to air pollution. The belt conveyor should be fully covered to avoid generation of dust while transportation. PP shall take necessary measures to avoid generation of fugitive dust emission.</p>	Noted and will be complied upon commencement of mining operations.
<b>VIII. Green Belt</b>		
29)	<p>The Project Proponent shall develop greenbelt in 7.5m wide safety zone all along the mine lease boundary as per the guidelines of CPCB in order to arrest pollution emanating from mining operations within the lease. The whole Green belt shall be developed within first 5 years starting from windward side of the active mining area, The development of greenbelt shall be governed as per the EC granted by the Ministry irrespective of the stipulation made in approved mine plan.</p>	Noted and will be complied upon commencement of mining operations.
30)	<p>The Project Proponent shall carryout plantation/ afforestation in backfilled and reclaimed area of mining lease, around water body, in community area etc. by planting the native species in consultation with the State Forest Department/ Agriculture. Department/ Rural development department/ Tribal Welfare Department/ Gram Panchayat such that only those species be selected which are of use to the local people. The CPCB</p>	Noted and will be complied upon commencement of mining operations.

	guidelines in this respect shall also be adhered. The density of the trees should be around 2500 saplings per Hectare. Adequate budgetary provision shall be made for protection and care of trees.	
31)	The Project Proponent shall make necessary alternative arrangements for livestock feed by developing grazing land with a view to compensate those areas which are coming within the mine lease. The development of such grazing land shall be done in consultation with the State Government. In this regard, Project Proponent should essentially implement the directions of the Hon'ble Supreme Court with regard to acquisition of grazing land. The sparse trees on such grazing ground, which provide mid-day shelter from the scorching sun, should be scrupulously guarded/ protected against felling and plantation of such trees should be promoted.	No grazing land is involved in our mining area. Hence this clause is not applicable
<b>IX.</b>	<b>Public hearing and human health Issues</b>	
32)	Project Proponent shall make provision for the housing for workers/labors or shall construct labor camps within/outside (company owned land) with necessary basic infrastructures/ facilities like fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, creche for kids etc. The housing may be provided in the form of temporary structures which can be removed after the completion of the project related infrastructure. The domestic waste water should be treated with STP in order to avoid contamination of underground water.	Noted and will be complied as per the requirement.
<b>X.</b>	<b>Corporate Environment Responsibility (CER)</b>	
33)	The Project Proponent shall submit the time-bound action plan to the concerned regional office of the Ministry within 6 months from the date of issuance of environmental clearance for undertaking the activities committed during public consultation by the project proponent and as discussed by the EAC, in terms of the provisions of the MoEF&CC Office Memorandum No.22-65/2017-IA.III dated 30 September, 2020. The action plan shall be implemented within three years of commencement of the project.	Noted.
<b>XI.</b>	<b>Miscellaneous</b>	
34)	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC.	Noted and will be complied upon commencement of mining operations.
35)	The Project Authorities should inform to the Regional Office regarding date of financial closures and final approval of the project by the concerned authorities and the date of start of land development work.	Noted and will be complied.

36)	The Project Proponent shall submit six monthly compliance reports on the status of the implementation of the stipulated environmental safeguards to the MOEFCC & its concerned Regional Office, Central Pollution Control Board and State Pollution Control Board.	Noted and will be complied.
37)	A separate 'Environmental Management Cell' with suitable qualified manpower should be set-up under the control of a Senior Executive. The Senior Executive shall directly report to Head of the Organization. Adequate number of qualified Environmental Scientists and Mining Engineers shall be appointed and submit a report to RO, MoEF&CC.	Noted and will be complied upon commencement of the mining operations
38)	The concerned Regional Office of the MoEF&CC shall randomly monitor compliance of the stipulated conditions. The project authorities should extend full cooperation to the MoEF&CC officer(s) by furnishing the requisite data / information / monitoring reports.	Noted and will be complied.
39)	In pursuant to Ministry's O.M No 22-34/2018-IA.III dated 16.01.2020 to comply with the direction made by Hon'ble Supreme Court on 8.01.2020 in W.P. (Civil) No 114/2014 in the matter Common Cause vs Union of India, the mining lease holder shall after ceasing mining operations, undertake regrassing the mining area and any other area which may have been disturbed due to other mining activities and restore the land to a condition which is fit for growth of fodder, flora, fauna etc.	Noted and will be complied.
40)	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.	Noted.
41)	Concealing factual data failure to comply with any or submission of false/ fabricated data and of the conditions mentioned above may result in withdrawal of this clearance and attract action under the provisions of Environment (Protection) Act, 1986.	Noted.
20.	The Ministry or any other competent authority may alter/modify the above conditions or stipulate any further condition in the interest of environment protection.	Noted.
21.	Concealing factual data or submission of false/fabricated data and failure to comply with any of the conditions mentioned above may result in withdrawal of this clearance and attracts action under the provisions of Environment (Protection) Act, 1986.	Noted.
22.	The above conditions will be enforced inter-alia, under the provisions of the Water (Prevention & Control of Pollution) Act, 1974, the Air (Prevention & Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules	Noted.

	made there under and also any other orders passed by the Hon'ble Supreme Court of India/ High Court and any other Court of Law relating to the subject matter.	
23.	Any appeal against this environmental clearance shall lie with the National Green Tribunal, if preferred, within a period of 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.	Noted.
24.	This issues with the approval of Competent Authority.	Noted.
