The Director,

Ministry of Environment, Forest and Climate Change (MoEF&CC), Regional Office, Western Region, "Kendriya Paryavaran Bhavan" Link Road No.3, Ravi Shankar Nagar, Bhopal – 462016, (M.P.)

Sub.: Half Yearly Compliance Status Report of Environmental Clearance of Solaj Mines.

Ref.: Environmental Clearance Order No. J-11015/177/2006-IA-II (M) dated 06.03.07

Sir,

We are pleased to submit herewith half yearly compliance status report (i.e. for the period of (October'2020 to March'2021) of Environmental Clearance Order No. J-11015/177/2006-IA-II(M) granted by MoEF to Solaj Mines of Ambuja Cements Ltd., located at village - Solaj, Taluka-Sutrapada, District - Gir Somnath (Gujarat).

Thanking you,

Yours Faithfully, For Ambuja Cements Ltd.

Anand Prakash Head-Environment

Encl.: As above.

MONITORING THE IMPLEMENTATION OF ENVIRONMENTAL SAFEGUARDS

Ministry of Environment, Forest and Climate Change Regional Office (W), Bhopal Monitoring Report Part-I

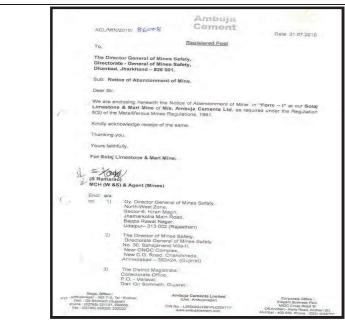

DATA SHEET

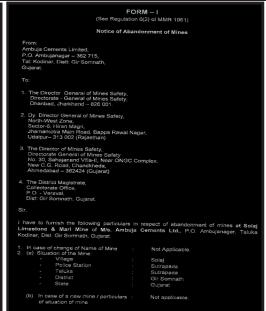

01	Project type	:	Mining
02	Name of the project	:	Solaj Limestone Mine
03	Clearance letter(s) / OM no. and date	:	J-11015/177/2006- IA ,II (M) , 6 th March 2007
04	Location		, , , , , , , , , , , , , , , , , , , ,
	a) District(s)	:	Gir Somnath
	b) State(s)	:	Gujarat
	c) Latitude	:	20°50' 11" - 20° 51' 30"
	d) Longitude	:	70° 36'24" - 70° 38'24"
05	Address for correspondence	:	
	a) Address of concerned Project Chief Engineer (with pincode & telephone / telex / fax numbers).	:	Sh. Anupam Agrawal Manufacturing Cluster Head (W&S) Ambuja Cements Ltd. PO Ambujanagar, Taluka: Kodinar, Pin- 362715 District: Gir Somnath (Gujarat). Tel: 02795-221137/232009/237403 Fax: 02795-220328/232032
	b) Address of Executive Project Engineer /	:	(Mines is Not in operation. From-1 is Submitted to DGMS)
	Manager (with pincode / fax numbers.		
06	Salient features		Ambuja Cements Ltd. has cement manufacturing plant at Ambujanagar in
	a) of the project		Kodinar Taluka of Gir Somnath District. Limestone & Marl are the main raw materials for the cement plants. The materials are being exploited from company's own captive mines i.e. Solaj Limestone Mine. Solaj is located at a distance of about 12 kms in WNW direction with respect to cement plant. The rated capacity of the limestone & marl is 1.0 & 0.4 MTPA respectively.
	b) of the environmental management plans	:	 Mining operations do not involve drilling and blasting for material rising. Limestone excavation is being carried out by Surface Miner, direct excavation by excavators and ripper dozer. Regular monitoring of environmental parameters is being undertaken as per statutory requirements. Regular preventive maintenance of HEMM is being undertaken. Water sprinkling on haul roads and in working area is being carried out on regular basis for dust suppression. Afforestation / Green belt development carried out along haul road and lease periphery, mines office, mined out area etc. Mined-out areas to be converted to pasture land or to be rehabilitated by afforestation or converted to water reservoirs as per approved mining plan. Literacy drive and Socio-economic improvement measures are undertaken in the project buffer zone and is in progress.
07	Break up of the project area.	:	
	a) Submergence area (forest & non-forest)	:	Not applicable
	b) Others	:	200.8184 ha (Gauchar land)
08	Break up of the project affected population with enumeration of those a houses / dwelling units only agricultural land only, both dwelling units & agricultural land & landless labourers / artisan.	:	Rehabilitation or evacuation not involved while executing the project and the same conditions are existing.

	a) SC, ST / Adivasis	:	Not applicable
	b) Others	:	Not applicable
09	Financial details	:	- The tappined block
	a) Project cost as originally planned and	:	Rs. 250 Lakhs
	subsequent revised estimates and the		- 151 - 151
	year of price reference.		
	b) Allocation made for environmental	•	Rs. 7.94 Cr.

S No. Condition					(Complia	nce Sta	tus				
A. 9	specific	Condi	ition:									
i	The environmental clearance is subject to final orders of the Hon'ble Court of Fast Track Judge & Joint District Judge, Veraval, in the matter.				• The final order has been issued on dated 14th November 2006 which has been already submitted to MoEF&CC vide our submission dated 25.12.2010 vide letter no.ACL/EMD/F-16/2010/55925.							
ii	Pollutio	on Contr	tions stipulated by the State rol Board in their NOC should be lemented.									
iii The proponent should carry out long terms studies on salinity and water levels in and around mining areas and submit report to this ministry, its Regional Office Bhopal and Central Ground Water Authority within a period of 6 months.				d s ıl	• Water conservation measures to augment ground water resources in the area are being done by Ambuja Cement Foundation (ACF). A report about ACF & community development work done by ACF in surrounding areas is enclosed as Annexure.A report on Impact of Limestone Mining and Salinity Status around ACL mines has been prepared by Ground Water & Mineral Investigation Consultancy Centre Pvt. Ltd. (GWMICC), Jaipur. Report has been already submitted to MoEF vide our submission dated 25.12.2010 vide letter no.ACL/EMD/F-16/2010/55925.

- viii Regular monitoring of ground water level and quality should be carried out by establishing a network of existing wells and construction new piezometers during the mining operation. The monitoring should be carried out four times in a year Pre monsoon (April/May), monsoon (August), Post monsoon (November) and winter (January) and the data thus collected may be sent regularly to Ministry of Environment and Forests, its Regional Office, Bhopal, Central Ground water Authority and Central Ground Water Board.
- Complied. Water quality testing is carried out with the help of MoEF certified third party laboratory as per prescribed schedule. Water levels are being recorded in 11 open wells of buffer zone and 2 piezometers are constructed in mines area core zone.
- Data collected is being communicated regularly to CGWA, New Delhi, MoEF Regional office (SEZ) Bhopal, CGWB Regional Director Gandhinagar.
- Ground water level & quality monitoring is being done regularly by establishing a network of ground water monitoring stations. Report is submitted to MoEF regional office Bhopal on six monthly basis. Ground water level & quality monitoring reports are enclosed as under:

- The Project authorities should obtain prior approval of the competent authority for withdrawal of groundwater if any, required for the project.
- No withdrawal of ground water so far.
 Water requirement for domestic use, dust suppression and greenbelt development is being met from harvested rain water in mined out pit.

X	The mineral handling plant should be provided with adequate number of high efficiency dust extraction system. Loading and unloading areas including all the transfer points should be properly maintained and operated.	•	No mineral handling plant at Mines site. Extracted mineral is transported to cement plant by trucks / tipper which are provided with mechanized double flap covering system.
xi	Vehicular emissions should be kept under control and regularly monitored. Measures shall be taken for maintenance of vehicles used in mining operations and in transportation of mineral. The vehicles should be covered with a tarpaulin and shall not be overloaded.	•	Vehicular emissions are checked regularly. All the vehicles used for transportation of minerals are provided with mechanized double flap covering system. Presently mining activity closed since 05.05.2014. & applied at IBM from for surrender of mines
xii	No drilling and blasting shall be undertaken in the project.	•	Drilling & Blast free fully mechanized Surface Miner machine is used for mining.
xiii	Digital processing of the entire lease area using remote sensing technique should be done regularly once in three years for monitoring land use pattern and report submitted to Ministry of Environment and Forests and its Regional Office, Bhopal.	•	Land use pattern report study has been conducted by Compusense Automation, Ahmadabad. Report is under preparation stage and will be submitted to MoEF&CC as soon as possible.
xiv	The void left unfilled in an area of 65.0 ha shall be converted into water body. The higher benches of excavated void/mining pit shall be terraced and plantation done to stabilize the slopes. The slopes of higher benches shall be made gentler for easy accessibility by local people to use the water, body. Peripheral fencing shall be carried out along the excavated area.	•	Excavated area is converted in to water bodies as per approved mining plan from IBM. Total Open mine area is 107.44 Ha. Higher benches will be made gentler for easy accessibility by local people to use the water body. Peripheral fencing of bella stone is provided along excavated area. Total 5138 meter brick wall, 15762 meter barbed wire and 16891 meter earthen bund fencing has been done.
XV	The project proponent should take all precautionary measures during mining operation for conservation and protection of endangered flora, endangered fauna such as leopard and endangered migratory bird species spotted in the study area. Action plan for conservation of flora and fauna shall be prepared and implemented in consultation with the state forest and wildlife Department. Necessary allocation of funds for implementation of the conservation plan shall be made and fund so allocated shall be included in the project cost. Copy of action plan may be submitted to the Ministry and its Regional Office within 3 months.	•	Status of Biodiversity (Flora & Fauna) in core and buffer zone area of Solaj Mines has been conducted by "Gujarat Institute of Desert Ecology", Bhuj. Report with action plan for conservation of flora and fauna has been already submitted to MoEF vide our submission dated 25.12.2010 vide letter no.ACL/EMD/F-16/2010/55925.
xvi	Consent to operate should be obtained from SPCB before starting enhanced production from the mine.	•	Pointed noted. CCA will be obtained in case of enhanced production from the mine.

- vi Industrial wastewater (workshop and waste water from the mine) should be properly collected, treated so as to confirm the standards prescribed under GSR 422(E) dated 19th May 1993 and 31st December installed before discharge of effluents from workshop.
- No industrial waste water generated as mines is not in operation.
- Personnel working in dusty areas should wear protective respiratory devices and they should also be provided with adequate training and information on safety and health aspects. Occupational health surveillance program of the workers should be undertaken periodically to observe any contractions due to exposure to dust and take corrective measures, if needed. The same program may be extended to adjoining village also.
- All personnel working in mines are provided with PPE's i.e.
 dust masks, safety shoes, safety goggle, Safety Reflective
 Jacket & Helmet. Occupational health surveillance program
 of all the workers (Including Third party workmen) are
 being undertaken every year by our Occupational Health
 Centre through our AMH Ambuja Multi Hospital. There is no
 case of any contraction due to exposure of dust in any
 workmen.
- They are also provided adequate training and information on safety and health aspects.

A separate environmental management cell viii A well established Environmental Management Division with suitable qualified personnel should be set (EMD) with suitable qualified personnel is in place. Head of up under the control of a senior executive, environmental management cell directly report to the Unit who will report directly to the Head of the of the organization.
