

Ambuja Cement to set up oxygen generating Plant at JLN Hospital, Nagaur

~Plant will have daily refilling capacity of 175-200 cylinders~

~Process to set up oxygen plant has commenced; should be ready within next 4 weeks~

Jaipur, April 30, 2021: With the incremental rise in the COVID-19 cases, Ambuja Cements Ltd and ACC Ltd, the two operating entities of LafargeHolcim in India, have come forward to support the community and the government authorities in Rajasthan in these trying times.

For the community at Nagaur, which is battling the Covid-19 pandemic, Ambuja Cements has decided to set up an oxygen generating Plant at the JLN Hospital, Nagaur with a capacity of 40-50 M3 (with daily refilling of around 175-200 cylinders).

The process to set up the oxygen plant has commenced and should be ready within the next four weeks.

“Ambuja Cement and ACC have always cared for the communities around its operations. Community well-being and safety is top most priority for the Company. As the society faces the challenges of the second wave of the pandemic, we look forward to partnering with government authorities in Rajasthan to counter the upheaval caused by Covid-19,” said **Mr. Neeraj Akhoury, CEO India, LafargeHolcim and Managing Director & CEO, Ambuja Cements Limited.**

In addition to setting up the plant, Ambuja Cements and ACC Limited, have placed an order to procure 100 oxygen concentrators, each with a capacity of 10 litres per minute. These will be supplied to communities of three districts in Rajasthan -- Bundi, Pali and Nagaur, where cement plant of both companies are located at -- Lakheri, Rabriyawas and Mundwa .

Letter of Intent (LOI) has been placed with the supplier. Ambuja has requested for the required support from the district administration for the speedy delivery from the manufacturing plant that is located in Bhiwadi.

About Ambuja Cement:

Ambuja Cements Ltd., a part of the global conglomerate LafargeHolcim, is among the leading cement companies in India. Ambuja Cement has a cement capacity of 29.65 million tonnes with five integrated cement manufacturing plants and eight cement grinding units across the country. Ambuja Cement has provided hassle-free, home-building solutions with its unique sustainable development projects and environment-friendly practices since it started operations. The Company has many firsts to its credit – a captive port with four terminals that has facilitated timely, cost-effective, cleaner shipments of bulk cement to its customers. To further add value to customers, the Company has launched innovative products like Ambuja Plus, Ambuja Cool Walls, Ambuja Compocem and Ambuja Kawach. These products not only fulfil important customer needs but also help in significantly reducing carbon footprints.
