

Ambuja Cement commissions oxygen generating Plant at Ambujanagar, Gujarat

- ~ Plant capacity will be 35-40 cylinders/day ~
- ~ Plant set up in 15 days to help the hospital ~

Ahmedabad, 5 May 2021: With the rising COVID-19 cases, supply of oxygen has become the need of the hour. To meet the increasing requirement, Ambuja Cements has installed an oxygen generating plant at Ambujanagar Multi-Specialty Hospital, Gujarat, to support the community members and local authorities.

The oxygen generating unit has a capacity of 35-40 cylinders a day at the flow rate of 10 Nm³/hr and has been set up in a record time on 2 weeks.

Neeraj Akhoury, CEO India, LafargeHolcim and Managing Director & CEO, Ambuja Cements Ltd, said, *“Community well-being has always been our priority, and it takes precedence as India bravely fights the second wave of the pandemic. In the current situation, oxygen supply is critical to combat the effects of COVID-19 and through setting up an oxygen generating plant, we aim to extend our support to the community members and local authorities in Gujarat.”*

Ambuja Cements has stepped up its efforts across India and undertook immediate actions for supply of oxygen.

In addition to Gujarat, Ambuja announced installing an oxygen generating plant in Rajasthan. The Company along with ACC Ltd, the two being the operating entities of LafargeHolcim in India, will be supplying 100 oxygen concentrators, each with a capacity of 10 litres per minute in the state. Ambuja Cements will also be transporting 300 oxygen concentrators of 10 litres each to Delhi government.

Ambuja Cements and ACC will continue to support and provide assistance to the Government, employees, its communities and citizens in these difficult times.

About Ambuja Cements Limited:

Ambuja Cements Ltd., a part of the global conglomerate LafargeHolcim, is among the leading cement companies in India. Ambuja Cement has provided hassle-free, home-building solutions with its unique sustainable development projects and environment-friendly practices since it started operations. Currently, Ambuja Cement has a cement capacity of 29.65 million tonnes with five integrated cement manufacturing plants and eight cement grinding units across the country. The company has many firsts to its credit – a captive port with four terminals that has facilitated timely, cost-effective, cleaner shipments of bulk cement to its customers. To further add value to customers, the company has launched innovative products like Ambuja Plus, Ambuja Cool Walls, Ambuja Compozem and Ambuja Kawach. These products not only fulfil important customer needs but also help in significantly reducing carbon footprints.
