Sub. : Half Yearly Compliance Status Report of Environmental Clearance of
Sugala Limestone Mines.

Ref. : Environmental Clearance No. J-11015/154/2018- IA.II (M) dated 15.01.2021

Sir,

We are pleased to submit herewith half yearly compliance status report (i.e. for the period of **(October'2023 to March'2024)** of Environmental Clearance No. J-11015/154/2018-IA-II (M) dated 15.01.2021 granted by MoEF&CC to **Sugala Limestone Mines** of Ambuja Cements Ltd., located at village – Sugala & Jagatiya, Taluka - Kodinar, District – Gir Somnath (Gujarat).

This is for your information and record please.

Thanking you,

Yours Faithfully,
For **Ambuja Cements Ltd.**

Devendra Singh Chauhan
Head-Environment

Encl.: As above.

MONITORING THE IMPLEMENTATION OF ENVIRONMENTAL SAFEGUARDS

Ministry of Environment & Forests,
Integrated Regional Office (Guj.), Gandhinagar
Monitoring Report, Part-I

DATA SHEET

S. N.	Particulars	Reply
01	Project type	Mining
02	Name of the project	Sugala Limestone Mining Project
03	Clearance letter(s) / OM no. and date	No. J-11015/6/2000 – IA,II (M), dated 20.06.2002 & No. J-11015/154/2018-IA-II(M), dated 15.01.2021
04	Location	
	a) District(s)	Gir Somnath
	b) State(s)	Gujarat
	c) Latitude	20° 52' 45" – 20° 54' 45"
	d) Longitude	70° 45' 30" – 70° 46' 45"
05	Address for correspondence	
	a) Address of concerned Project Chief Engineer (with pin code & telephone / telex / fax numbers).	Sh. Devendra Singh Chauhan (Head - Environment) Ambuja Cements Ltd. PO Ambujanagar, Taluka : Kodinar, District: Gir Somnath (Gujarat). Pin. : 362715, Tel: 02795-237011, Fax: 02795 - 220328/232032
	b) Address of Executive Project Engineer / Manager (with pincode / fax numbers.)	Sh. Mayurkumar Galoriya Mines Manager, Ambuja Cements Ltd PO :Ambujanagar , Taluka - Kodinar District : Gir Somnath (Gujarat) Pin. : 362715 Tel: 02795-237217, Fax: 02795 - 220328/232032
06	Salient features	
	a) Present Status of the project	Ambuja Cements Ltd. has cement manufacturing plant at Ambujanagar in Kodinar Taluka of Gir Somnath District. Limestone is the main raw material for the cement plants. The materials are being exploited from company's own captive mines i.e. Sugala Limestone Mine. Sugala is located at a distance of about 18 kms in NNE direction with respect to cement plant. The rated capacity of the limestone is 1.29 MTPA.
	b) of the environmental management plans	<ul style="list-style-type: none"> * Mining operations do not involve drilling and blasting for material rising. Limestone excavation being carried out by Surface Miner & Ripper Dozer * Regular monitoring of environmental parameters is carried out as per the norms evolved by MoEF and IBM. * Preventive maintenance of deployed HEMM being undertaken on regular basis. * Dust suppression by water sprinkling on haul roads and in working area. * Afforestation / Green belt development along haul road near office building and lease periphery is being implemented. * Mined-out areas would be converted to plantation / agri-farm and water reservoirs as envisaged in the mining plan partial reclaiming already done. * Socio-economic improvement measures are being

			undertaken in the project buffer zone as envisaged.																																																																																																																																																																																																																																																															
07	Break up of the project area.																																																																																																																																																																																																																																																																	
	a) Submergence area(forest & non-forest)		Not Applicable																																																																																																																																																																																																																																																															
	b) Others		Private Land - 414.8493 ha , Govt. Land - 2.5091 ha																																																																																																																																																																																																																																																															
08	Break up of the project affected population with enumeration of those losing houses / dwelling units only, agricultural land only, both dwelling units & agricultural land & landless labourers / artisans.		Not Applicable, since there is no human settlement in the core zone area,																																																																																																																																																																																																																																																															
	a) SC, ST / Adivasis		Not Applicable																																																																																																																																																																																																																																																															
	b) Others		Not Applicable																																																																																																																																																																																																																																																															
09	Financial details																																																																																																																																																																																																																																																																	
	a) Project cost as originally planned and subsequent revised estimates and the year of price reference.		Limestones raised from Sugala area partially supplement the requirements of existing cement units. As it is a captive mine for the existing cement plants, no separate project costing was made.																																																																																																																																																																																																																																																															
	c) Allocation made for environmental management plans with item wise and year wise break-up.		Capital Investment for environment protection measures - 207.08 Lakhs. List Are enclosed as under.

S N	Environmental Conditions	Compliance status
A.	Specific conditions	
a)	Plantation must be completed within 3 years along the periphery of the lease area.	<ul style="list-style-type: none"> In up to October'2023 to March'2024 we have planted 5906 nos trees till date and activity is in progress. Total proposed plantation area along periphery is 20.8184 Ha, out of that we have covered 16.0898 Ha till date. Total 36755 Nos have been planted since inception along the periphery. Remaining 4.7286 Ha area will be covered till Oct'25.
		
b)	Total plantation must be completed within 4 years before the closure of mine which shall be duly approved by IBM and must be incorporated in the approved mining plan.	<ul style="list-style-type: none"> As per the approved conceptual plan the plantation program is as under : <ul style="list-style-type: none"> (i) Total proposed Plantation area is 46.0 Ha (ii) Till date area covered under total plantation is 16.0898 Ha. (iii) Plantation activity is part of IBM approved mine closure plan (Progressive and / or Final) we will ensure that plantation in 30.2952 Ha area will be covered.
c)	The project proponent shall adopt the	<ul style="list-style-type: none"> We are using environment friendly Surface

	appropriate mitigation measures to prevent negative impacts of mining activities on the neighboring areas.	Miner machine which having inbuilt water spray system during excavation thus there is no noise & dust emission. Thus there are no impact of noise and vibration as we are not doing any drilling and blasting activity. On all haul roads regular water sprinkling is being done by water tankers. All transportation vehicles are equipped with multi cap to transport material in covered condition. Presently due to the our rain water harvesting in mined out pits the salinity of the ground water has been effectively reduced and now the neighboring farmers are using ground water for watering their crops. They are taking three crops in a year where earlier there was only single crop farming in practice.
d)	Broad leaved tree sapling of not less than 10 feet height and maintenance of the same shall be carried.	<ul style="list-style-type: none"> We deploy dedicated team to monitor, watering, caring and nurturing of planted sapling. Saplings of 8 to 10 feet height were planted Peepal (Ficus religiosa) Banyan Tree (Ficus benghalensis), Badam (Terminalia catappa) etc. However availability of broad leave tree sapling is a challenge, we are continuously engaging with nurseries to find out the sources. Also we are facing problem in maintenance of high rise saplings due to their vulnerability to wind speed and heavy rains <p>Planted 10 feet long Planted Trees Pics</p>
		
B.	Standard conditions	
I.	Statutory compliance	
1	This Environmental Clearance (EC) is subject to orders/ judgment of Hon'ble Supreme Court of India, Hon'ble High Court, Hon'ble NGT and any other Court of Law, Common Cause Conditions as may be applicable.	<ul style="list-style-type: none"> We are abide to follow all the orders/ judgment of Hon'ble Supreme Court of India, Hon'ble High Court, Hon'ble NGT and any other Court of Law, Common Cause Conditions as may be applicable.
2	The Project proponent complies with all the statutory requirements and judgment of Hon'ble Supreme Court dated 2nd August ,2017 in Writ	<ul style="list-style-type: none"> We are complying all statutory requirement and judgment of Hon'ble Supreme Court.

	transportation and use of heavy machinery in the impact zone. The ambient air quality shall also be monitored at prominent places like office building, canteen etc. as per the site condition to ascertain the exposure characteristics at specific places. The above data shall be digitally displayed within 03 months in front of the main Gate of the mine site.	
--	---	---

10	Effective safeguard measures for prevention of dust generation and subsequent suppression (like regular water sprinkling, metalled road construction etc.) shall be carried out in areas prone to air pollution wherein high levels of PM10 and PM2.5 are evident such as haul road, loading and unloading point and transfer points. The Fugitive dust emissions from all sources shall be regularly controlled by installation of required equipment's / machineries and preventive maintenance. Use of suitable water-soluble chemical dust suppressing agents may be explored for better effectiveness of dust control system. It shall be ensured that air pollution level conform to the standards prescribed by the MoEF&CC/ Central Pollution Control Board.	<ul style="list-style-type: none"> We have deployed mechanized covered tippers for transportation of limestone. We have deployed dedicated water tankers for water sprinkling on haul road. We have surface miners equipped with water spray system during loading and excavating the limestone. Half yearly ambient air quality monitoring report is being regularly submitted to MoEF&CC, our last submission was on 20.11.2023 vide letter ACL/EMD/F-16/2023/2583/81998 Ambient air quality monitoring results for the period October'2023 to March'2024 is enclosed as under.

III.	Water quality monitoring and preservation	
11	In case, immediate mining scheme envisages intersection of ground water table, then Environmental Clearance shall become operational only after receiving formal clearance from CGWA. In case, mining operation involves intersection of ground water table at a later stage, then PP shall ensure that prior approval from CGWA and MoEF&CC is in place before such mining operations. The permission for intersection of ground water table shall essentially be based on detailed hydro-geological study of the area.	<ul style="list-style-type: none"> • There is no drilling and blasting in our mining area. We do mining extracting limestone slice by slice using a specialized equipment named Surface Miner. The present model of Surface Miner does not have capacity to work inside and/or with water • We have initiated a detailed Hydrogeological study of the area and based on outcome of the study as well as future mining operations, we will take necessary clearances from MoEF&CC and CGWA.
12	Project Proponent shall regularly monitor and maintain records w.r.t. ground water level and quality in and around the mine lease by establishing a network of existing wells as well as new piezo-meter installations during the mining operation in consultation with Central Ground Water Authority/ State Ground Water Department. The Report on changes in Ground water level and quality shall be submitted on six-monthly basis to the Regional Office of the Ministry, CGWA and State Groundwater Department /State Pollution Control Board.	<ul style="list-style-type: none"> • Ground water level & Analysis monitoring is being done regularly by establishing a network of ground water monitoring stations. Report is submitted to MoEF&CC Integrated Regional office (SEZ) Gandhinagar, CGWB, CGWA and GPCB on yearly (2022-23) basis. Last submitted on 09.08.2023 vide letter no ACL/EMD/F-9/2023/2549/81749.
13	The Project Proponent shall undertake regular monitoring of natural water course/ water resources/ springs and perennial nallahs existing/ flowing in and around the mine lease including upstream and downstream. Sufficient number of gullies shall be provided at appropriate places within the lease for management of water. The parameters to be monitored shall include their water quality vis-a-vis suitability for usage as per CPCB criteria and flow rate. It shall be ensured that no obstruction and/ or alteration be made to water bodies during mining operations without justification and prior approval of MoEF&CC. The monitoring of water courses/ bodies existing in lease area shall be carried out four times in a year viz. pre- monsoon (April-May), monsoon (August), post-monsoon (November) and winter (January) and the record of monitored data may be sent regularly to Ministry of Environment, Forest and Climate Change and its Regional Office, Central Ground Water Authority and Regional Director, Central Ground Water Board, State Pollution Control	<ul style="list-style-type: none"> • We have under taken work of construction of check dams along the Shighoda Rivers for the water management. We also monitoring water quality of the upstream and downstream of the Shinghoda River. • The Ground water level & Analysis monitoring is being done regularly by establishing a network of ground water monitoring stations. Report is submitted to MoEF&CC Integrated Regional office (SEZ) Gandhinagar, CGWB, CGWA and GPCB on yearly (2022-23) basis. Last submitted on 09.08.2023 vide letter no ACL/EMD/F-9/2023/2549/81749.

Opinion for suitability is given considering above 14 Test Parameters only.													

Option for potability is given considering above 14 Test Parameters only.

- 14 Quality of polluted water generated from mining operations which include Chemical Oxygen Demand (COD) in mines run-off; acid mine drainage and metal contamination in runoff shall be monitored along with Total Suspended Solids (TDS), Dissolved Oxygen (DO), pH and Total Suspended Solids (TSS). The monitored data shall be uploaded on the website of the company as well as displayed at the project site in public domain, on a display board, at a suitable location near the main gate of the Company. The circular No. J-20012/1/2006-IA,II (M) dated 27.05.2009 issued by Ministry of Environment, Forest and Climate Change may also be referred in this regard.
 - No waste water or mine drainage from mining operations.
- 15 Project Proponent shall plan, develop and implement rainwater harvesting measures on long term basis to augment ground water resources in the area in consultation with Central Ground Water Board/ State Groundwater Department. A report on amount of water recharged needs to be submitted to Regional Office MoEFCC annually.
 - We through our CSR arm Ambuja Cement Foundation have implemented rainwater harvesting measures on long term basis to augment ground water resources in consultation with govt. authorities.

**Compliance Status of Environment Clearance issued to
Sugala Limestone Mines**

**vide MoEF&CC Letter No : No. J-11015/6/2000 – IA,II (M), dated 20.06.2002 &
No. J-11015/154/2018-IA-II(M), dated 15.01.2021**

16	Industrial waste water (workshop and waste water from the mine) should be properly collected and treated so as to conform to the notified standards prescribed from time to time. The standards shall be prescribed through Consent to Operate (CTO) issued by concerned State Pollution Control Board (SPCB). The workshop effluent shall be treated after its initial passage through Oil and grease trap.	<ul style="list-style-type: none"> No waste water or mine drainage from mining operations.
17	The water balance/water auditing shall be carried out and measure for reducing the consumption of water shall be taken up and reported to the Regional Office of the MoEF&CC and State Pollution Control Board/Committee.	<ul style="list-style-type: none"> The water consumption is for drinking purpose, green belt development & haul road dust suppression.

IV. Noise and vibration monitoring and prevention

18	The peak particle velocity at 500m distance or within the nearest habitation, whichever is closer shall be monitored periodically as per applicable DGMS guidelines.	<ul style="list-style-type: none"> We are doing mining through eco-friendly surface miners. There are no drilling and blasting activities done. Thus no vibration or noise impact on nearby habitation.
19	The illumination and sound at night at project sites disturb the villages in respect of both human and animal population. Consequent sleeping disorders and stress may affect the health in the villages located close to mining operations. Habitations have a right for darkness and minimal noise levels at night. PPs must ensure that the biological clock of the villages is not disturbed; by orienting the floodlights/ masks away from the villagers and keeping the noise levels well within the prescribed limits for day /night hours.	<ul style="list-style-type: none"> We are operating our mines during day time only i.e. 06:00 AM to 06:00 PM. Mining is done by using eco-friendly surface miners. Tree plantation has been done around the periphery of lease area. The day and night time noise level is very well within the prescribed limit and monitored and reported to GPCB & MoEF&CC regularly. Ambient Noise monitoring report for the period October'2023 to March'2024 is enclosed as under :

**Compliance Status of Environment Clearance issued to
Sugala Limestone Mines
vide MoEF&CC Letter No : No. J-11015/6/2000 – IA,II (M), dated 20.06.2002 &
No. J-11015/154/2018-IA-II(M), dated 15.01.2021**

	OB / waste dumps / topsoil dump like height, width and angle of slope shall be governed as per the approved Mining Plan and the guidelines/circulars issued by D.G.M.S. The topsoil shall be used for land reclamation and plantation.	
24	The slope of dumps shall be vegetated in scientific manner with suitable native species to maintain the slope stability, prevent erosion and surface run off. The selection of local species regulates local climatic parameters and help in adaptation of plant species to the micro-climate. The gullies formed on slopes should be adequately taken care of as it impacts the overall stability of dumps. The dump mass should be consolidated with the help of dozer/ compactors thereby ensuring proper filling/ leveling of dump mass. In critical areas, use of geo textiles/ gee-membranes / clay liners / Bentonite etc. shall be undertaken for stabilization of the dump.	<ul style="list-style-type: none"> • There are no dumps of Overburden in the mining lease area. • Topsoil is used for reclamation and plantation purpose. The slopes are maintained in a manner to ensure the stability. • Native species trees are sourced from local nurseries and planted.
25	Catch drains , settling tanks and siltation ponds of appropriate size shall be constructed around the mine working, mineral yards and Top Soil/OB/Waste dumps to prevent run off of water and flow of sediments directly into the water bodies (Nallah/ River/ Pond etc.). The collected water should be utilized for watering the mine area, roads, green belt development, plantation etc. The drains/ sedimentation sumps etc. shall be de-silted regularly, particularly after monsoon season, and maintained properly.	<ul style="list-style-type: none"> • Catch drains have been constructed around mine working area. No runoff enters in any water body. All the runoff is channelized through catch drain and connected to harvesting pits. The rainwater harvested in the mined out pit is being used for green belt development.
26	Check dams of appropriate size, gradient and length shall be constructed around mine pit and OB dumps to prevent storm run-off and sediment flow into adjoining water bodies. A safety margin of 50% shall be kept for designing of sump structures over and above peak rainfall (based on 50 years data) and maximum discharge in the mine and its adjoining area which shall also help in providing adequate retention time period thereby allowing proper settling of sediments / silt material. The sedimentation pits / sumps shall be constructed at the corners of the garland drains.	<ul style="list-style-type: none"> • There is no OB generation however garland drains around the mine pits have been constructed to avoid runoff into water bodies around lease.
VII	Transportation	
27	No Transportation of the minerals shall be allowed in case of roads passing through villages/ habitations. In such cases, PP shall construct a 'bypass' road for the purpose of transportation of the minerals leaving an	<ul style="list-style-type: none"> • We have deployed dedicated water tankers for spraying water on haul roads and roads are being continuously wetted for suppressing the dust emission. We have obtained PUC for our all vehicles.

31	The Project Proponent shall make necessary alternative arrangements for livestock feed by developing grazing land with a view to compensate those areas which are coming within the mine lease. The development of such grazing land shall be done in consultation with the State Government. In this regard, Project Proponent should essentially implement the directions of the Hon'ble Supreme Court with regard to acquisition of grazing land. The sparse trees on such grazing ground, which provide mid-day shelter from the scorching sun, should be scrupulously guarded/ protected against felling and plantation of such trees should be promoted.	<ul style="list-style-type: none"> We have developed 9.0 hectares of fodder plot at Sabdharvidi, Jamvala jointly with Forest Department. The fund was allotted in two stages: In first stage, fund of Nine Lakhs Twenty Six Thousand Eight Hundred and Fifty Seven thousand (926857/-) was released vide our letter No. GACL/SEP/06/5952 dtd. 03/11/2006. In second Stage, fund of Twelve Lakhs Ninety Nine Thousand Eight Hundred Thirty Nine (1299839/-) was released vide our letter No. GACL/GEO/TRR/05 Dated 15/02/2005. Details of fodder plot developed has been already submitted to MoEF vide our submission dtd. 25.12.2010 vide letter no. ACL/EMD/F-16/2010/55926.
IX	Public hearing and human health issues	
32	Project Proponent shall make provision for the housing for workers/labors or shall construct labor camps within/outside (company owned land) with necessary basic infrastructure/ facilities like fuel for cooking , mobile toilets , mobile STP, safe drinking water , medical health care, creche for kids etc. The housing may be provided in the form of temporary structure which can be removed after the completion of the project related infrastructure. The domestic waste water should be treated with STP in order to avoid contamination of underground water.	<ul style="list-style-type: none"> Not applicable as it is existing mine. There is no requirement of any type of labour or /work force.
X	Miscellaneous	
34	The Project Proponent shall prepare digital map (land use & land cover) of the entire lease area once in five years purpose of monitoring land use pattern and submit a report to concerned Regional Office of the MoEF&CC .	<ul style="list-style-type: none"> We carry out digital processing of the entire lease area once in every five year. Year 2023 report has been submitted to MoEF&CC, New Delhi and its Integrated Regional Office Gandhinagar on Dated 25.08.2023 vide letter No. ACL/EMD/F-9/2023/2552/81796.
